GREAT

SALT RIVER HERALD.

SEMI-WEEKLY EDITION.

Saturday, February 15, 1879.

THE WEALTH OF ARIZONA.

An Interview with A. C. Hesing—

Matters of Interest to Investors.

for special mention the Julius Chloride, Dunderberg, Green Tree, Grey Eagle, Spring Well, Jay Bird, Red Rover, Eclipse and Emilie.

The ores from each and every one of these mines assay very high. Choice samples from the Julius have yielded at the rate of \$30.40, \$20.72, and \$7.105 per ton; while the one of the Red Rover has yielded, by assay, as much as \$7.267.11 per ton, and from that figure down to \$19.62. A shaft has been sunk upon the Julius to a depth of forty-two feet, and three drifts, each twenty-five feet in length, having been run, from which \$15,000 worth of ore has been removed and this, too, at a cost of only \$750. In one drift the wall now displays a magnificent body of mineral. The Red Rover, consisting of three fine veins running parallel, is a continuation of the Eclipse. From the Chloride mine two tons of ore were extirpated, which yielded \$2,000 in bullion, and this is a vein upon which, as yet, but little work has been performed.

Mr. Hesing's inspection of the

mines afforded him convincing proof

that each one is a true fissure vein.

In the camp are twelve hundred

and six hundred mines in varying

stages of development. The new

mill can be kept constantly supplied

with "custom work," and Mr. Hesing

is very sure that the investment will

pay a handsome dividend. The ma-
